FACT SHEET RESEARCH 2019

FACULTY OF MEDICINE

The Faculty of Medicine and the University Hospital of Ludwig-Maximilians-Universität in Munich are among Europe's leading centers of scholarly medicine. The university is connected to milestones and persons of the history of medicine: Wilhelm Conrad Röntgen (x-rays), Alois Alzheimer (neurodegenerative dementia), Max von Pettenkofer (hygiene), Adolf Friedrich Johann Butenandt (sexual hormones), and Feodor Lynen (cholesterol synthesis).

The faculty is member of all six national centers for health research (translational cancer research, pneumology research, infectious diseases research, cardiovascular research, diabetes research and neurodegenerative diseases research). These centers reflect the foci of medical research that are actively pursued in Munich, from the basic preclinical and clinical disciplines

UNIVERSITY HOSPITAL

Thanks to its achievements in research, teaching and patient care, the University Hospitals enjoy an excellent reputation both nationally and internationally. Our 10,055 staff members in the areas of medicine, patient care, administration, technology and maintenance are taking care of patients in 47 clinical departments, insti-

to rare diseases research. As part of the national program for excellence the faculty hosts the Munich Cluster for Systems Neurology and co-hosts the Graduate School of Systemic Neurosciences and the Graduate School of Quantitative Biosciences. The Faculty is speaker to six nationally supported Collaborative Research Centers ('Sonderforschungsbereiche') by the German Research Foundation (DFG). It hosts five Advanced Grants and four further research projects by the European Research Council (ERC) and coordinates six national and european projects. The university hospital receives an annual research budget of 140 million Euro from the State of Bavaria and secures additional extra funding of over 90 million Euro per year.
